## MA 1023 – Methods of Mathematics: B.Sc(Eng) S2 (2016 batch)

1. 70% of the module mark will be from the end of semester final exam paper of three hours duration.
2. End of semester final exam paper will contain three sections as Probability and Statistics, Ordinary Differential Equations and Multivariate Calculus, and Numerical Methods. Each section has two questions. You are required to answer all **six questions**. The questions in these three sections should be answered in 3 **separate books** and label them as **A,B,C**.
3. 15% of the final module mark will be from the mid semester exam and 10% of the final mark will be from **spot tests given during tutorial classes**. 5% of the final mark will be from the **inclass tests given during the lectures**.
4. Without prior notification spot tests may be given during the tutorial classes based on questions given in tutorials. **Spot tests are individual tests**.
5. Some questions in the tutorial are discussed in tutorial class but no tutorial submission is necessary.
6. **Students must hand over the spot test paper immediately after the time allocated for the test is over. Late submission will not be accepted at all.**
7. **Copying and talking during spot tests is strictly prohibited and violators will be dealt with severely.**
8. Students should come to the tutorial class on time.
9. Students who do not write index number and group on the spot test will not be marked.
10. Group/Field representatives are advised to arrange extra classes for missed or incomplete classes.
11. Students should regularly check the level 1 notice board at the Department of Mathematics.
12. In case of problems regarding tutorial classes contact the respective tutors.
13. In case of a student gets absent for a spot test he/she should produce sufficient evidence within one week.

**Department of Mathematics,  
Faculty of Engineering.**
